1.0 TITLE

UNIVERSITY EVENT EQUIPMENT MANAGEMENT SYSTEM (UniEquip)

2.0 PROBLEM STATEMENTS

- Equipment bookings are done manually and cause confusion.
- No real-time updates on equipment availability.
- Hard to track who used or returned the equipment.
- Time-consuming approval and request process

3.0 OBJECTIVES

- To develop a user-friendly web system for booking and managing event support equipment.
- To provide real-time tracking of equipment availability, usage, and booking status.
- To improve efficiency and reduce errors by automating the equipment request and approval process.

4.0 SYSTEM DEVELOPMENT METHODOLOGY

We chose Agile Development for this project because it allows us to build the system in small parts, test each part quickly, and improve it based on feedback. This method is especially suitable for a university event booking management system because user needs can change often, and Agile lets us easily update or add features as needed. It also helps us deliver a working version early, so students and staff can start using the system while we continue to improve it. This step-by-step approach ensures the system is user-friendly, flexible, and meets real university requirements.

5.0 SCOPES

- User Features:
 - Register a new account
 - Log in to an existing account
 - Enter booking details
 - Select start and end date of the event
 - Choose equipment from the list
 - Submit equipment booking request
 - View booking history

- Admin Functionality:
 - Register new admin
 - Log in to an existing account
 - Manage equipment inventory
 - Manage club registration
 - Approve or reject booking requests
 - Track equipment status whether it is pending, approved, borrowed, rejected or returned
 - Generate reports on bookings and equipment usage

6.0 MEMBERS' PARTICULAR DETAILS

ID	NAME	GROUP	PROGRAMME
2023443918	MUHAMMAD AKMAL WAFI BIN MUHAMMAD HATTA	A4CDCS2304A	CDCS230
2023226262	MUHAMAD WAFI BIN AFFANDI	A4CDCS2304A	CDCS230
2023436146	MUHAMMAD IDHAM BIN ZUHRI	A4CDCS2304A	CDCS2320
2023261622	MUHAMMAD DANISH IRFAN BIN MUHAIZUL	A4CDCS2304A	CDCS230
2022800956	MOHAMAD AMIRUL AMIN BIN MOHD NAZLI	A4CDCS2304A	CDCS230

7.0 ROLES & RESPONSIBILITY OF THE GROUP MEMBERS

NAME	ROLES AND RESPONSIBILITY
MUHAMMAD AKMAL WAFI BIN MUHAMMAD HATTA	Project Manager • Plans the project. • Assigns tasks. • Tracks progress and deadlines. • Communicates with the team
MUHAMAD WAFI BIN AFFANDI	Back-End Developer • Handles server and database logic. • Connects the front-end to the database. • Makes sure the app runs smoothly behind the scenes
MUHAMMAD IDHAM BIN ZUHRI	Database Designer • Designs the database structure. • Organizes how data is stored and connected. • Ensures data is secure and efficient.

MUHAMMAD DANISH IRFAN BIN MUHAIZUL	Front-End Developer • Builds the user interface. • Connects designs to code. • Make sure the app looks and works well on screen.
MOHAMAD AMIRUL AMIN BIN MOHD NAZLI	UI/UX Designer • Designs the user interface. • Ensures the app is easy to use.

Figure 7: Data Dictionary

11.0 USER INTERFACE DESIGN

The image displays four sequential screenshots of the University Inventory Management System user interface, set against a purple gradient background.

Home Dashboard: The top screenshot shows the main dashboard. On the left, the title "University Inventory Management System" is followed by the tagline "Streamline your university's equipment management with our comprehensive digital solution." Below this are six feature cards: "Track equipment availability in real-time", "Submit booking requests online", "Generate detailed reports", "Manage university events efficiently", "Paperless reservation system", and "Manage inventory & approvals". On the right, a "Get Started" section includes a "Login to Portal" button, a link to "or create new account", and a "Register User" button. Below these are two user roles: "Staff: Manage inventory & approvals" and "Students: Book equipment for events".

Student Registration: The second screenshot shows the "Student Registration" form. It includes fields for "Student Name", "Student Number", "Password", "Phone Number", "Email Address", "Select Faculty", and "Select Center Code". There are "Submit" and "Reset" buttons at the bottom, along with a "Back to Home" link.

Welcome Back (Login): The third screenshot shows the "Welcome Back" login screen. It prompts the user to "Sign in to access your Uniforce account". It includes fields for "Student / Staff Number" and "Password", a "Select Your Role" section with "Student" and "Admin" buttons, and "Sign In" and "Reset" buttons. A "Back to Home" link is at the bottom.

Login Successful: The fourth screenshot shows the "Login Successful" confirmation screen. It features a green checkmark icon, the text "Login Successful! Welcome! Redirecting to your dashboard...", and a "Continue" button. "Sign In" and "Reset" buttons are also visible at the bottom, along with a "Back to Home" link.

12.0 METHOD/TECHNIQUES APPLIED

Development Technologies:

- **Front-End Development:**

HTML: To create the content and structure of the web. It tells what elements to apply but not the look and the behaviour.

CSS: To control the appearance and layout of web pages

- **Back-End Development:**

JavaScript: To make websites more interactive, dynamic and responsive.

PHP: doing handling forms, working with database, manage user and generating dynamic page content

MYSQL: used to store, manage and retrieve data for websites and applications

- **Security Session**

This technique will ensure that only authorized user can access specific function

- **CRUD Operations**

This technique will allow administrators to insert, view, update and delete record as well as searching for records.

- **User Authentication**

This technique can verify user credentials when login and blocked access to unauthorized user

13.0 APPENDIX

PROJECT REPORT RUBRIC

Category	Remarks/Marks				
	Poor	Mediocre	Good	Excellent	Outstanding
Project Overview	1	2	3	4	5
	Specify the description of all processes involved in the organization related to your project. For a better understanding, you may provide a flow chart/business process modelling				
Problem Statement	1	2	3	4	5
	Specify 2 – 3 current problems faced by the organization based on your Project Overview				
Proposed System Objectives	1	2	3	4	5
	State 3 objectives related to your project				
System Development Methodology	1	2	3	4	5
	Provide description of System Development Methodology that going to be used or has been used for this project.				
Database Design	1	2	3	4	5
	Provide Entity Relationship Diagram (ERD). Please use appropriate tool to create your ERD				
Documentation & Format	1	2	3	4	5
	Follow the documentation format with an appropriate arrangement and fulfilled requirements.				

Total (30)		Total (5%)
